**Subject: Follow up Report for study sponsored by NVF-stipend**

Dear Gunn Enge / Kjell Levik,

I would like to submit a status report of the study undertaken at Imperial College, London which was funded by NVF-stipend. The following courses related my PhD were undertaken at Imperial College, London in the Spring Semester of 2007:

- T.11 Quantitative techniques for transport engineering and planning
- T.14 Advanced transport modelling
- T.15 Understanding and modelling travel behaviour

It was a rewarding experience for me, giving me an insight into the teaching methods applied at Imperial College and knowledge gained on the 'Activity Based Modelling Approach'. I also undertook written exam for two of the courses (T.11 Quantitative techniques for transport engineering and planning and T.15 Understanding and modelling travel behaviour) and was awarded grade B on both the subjects.

For your reference, please find attached photocopies of the following documents with this mail.

- Certificate of Participation
- Results for both the exams undertaken

Yours sincerely,

**Tanu Priya**
